

CESTRA® PRIMARY

Knitted Viscose Primary Dressing BP

Cestra Primary is a low adherent wound contact layer for moderately to highly exuding chronic wounds such as leg ulcers. Primary provides a wound interface which allows the free passage of exudate into secondary absorbent materials.

- **Offers major cost savings of up to 30% on Drug Tariff ¹**
- Easy to apply and remove
- A large dressing which covers most wounds
- Can remain in situ when secondary dressing is changed
- Primary dressings are the dressing of choice beneath four layer bandage systems such as Ultra Four

Primary Code 7941
Size 12.5x14.5cm
Per box 25
